## WORK EXPERIENCE

### Frontend and backend programming

Ton Duc Thang University

10/2020 - 10/2024

Ho Chi Minh City, Viet Nam

It is the first public university in Vietnam with facilities and teaching conditions rated 5 international stars according to QS Stars standards (UK).

#### Achievements/Tasks

- Design data architecture using SQL Server and MongoDB.
- Use security and spring boot to configure security for the website system.
- Build and develop websites on Java and NodeJS platforms.
- Build and develop android mobile phone applications using Java programming language.
- Build and develop mobile applications using React Native.
- Build and develop website applications using ReactJS.
- Process data from the frontend sent to the backend.

## PERSONAL PROJECTS

### Build a music website

Git: <https://github.com/conghiale/ProjectNodeJS.git>

- Use technologies such as NodeJS, ExpressJS, HTML, CSS, Javascript.
- The website allows users to follow their favorite artists and connect with friends.
- The website allows users to share songs, albums, playlists with other users or on social networks.
- On each page of a song, logged in users can comment on the song and can view other users' comments.

### Build a book selling website

Git: <https://github.com/conghiale/ProjectCongNgheJava.git>

- Using Java technology, Spring boot, Spring Security, ReactJS.
- Configure website security and user access rights using Spring Security.
- Building a Server-Side Rendering website system with ReactJS as frontend and Java as backend.
- The website uses pagination and arrangement techniques to display products.

## PERSONAL PROJECTS

### **Build a java android vocabulary learning application**

Git: [https://github.com/conghiale/Quizlet\\_app.git](https://github.com/conghiale/Quizlet_app.git)

- Use java programming language.
- View a list of public topics across the system in a separate interface.
- View information related to the rankings of a public topic.
- Apply text to speech to play sounds of English words automatically for each word in learning modes.

### **Build an application to reference tourist destinations with integrated maps**

Git: <https://github.com/conghiale/TravelApp.git>

- Use React Native to build application UI.
- User login and authentication function.
- Displays famous tourist destinations in Vietnam on google map.
- User creates a new travel destination and Admin will approve that location (reject or accept).
- Admin can manage users using the application (login history, favorite places...).
- Users can comment or favorite a tourist destination when viewing details of that tourist destination.

## VOLUNTEER EXPERIENCE

### **Student install the application**

Ton Duc Thang University

10/2020 - 10/2024

Ho Chi Minh City, Viet Nam

#### Achievements/Tasks

- Install learning support applications such as Microsoft, Android Studio, Visual Studio Code, ....
- Install windows operating system.
- Clean your computer (Laptop).

## PERSONAL PROJECTS

- Working space
- Monthly salary
- Job requirements
